Do you feel like everyone in your group contributed to the final project?

Yes, I believe that every member of my group contributed to the completion of the final project.

Do you feel like the workload of the final project was distributed fairly amongst the people in your group?

Yes, the workload was fairly distributed among us. I focused on coding tasks and creating the RMD file. Jenny, showcased exceptional writing skills and took responsibility for most of the written components, including the literature review and introduction. She also helped us manage the 'moving outliers' section. Gulshan and Pradeepa actively participated in discussions about the results and contributed valuable ideas during the coding phase. Everyone made it a point to attend our meetings, and we all collaborated effectively, bringing great ideas to the table during brainstorming sessions.

Please let me know if you have any comments or concerns regarding the group and its completion of the project.

I think our group worked really well together. The workload was distributed evenly, and everyone completed their tasks on time. Whenever challenges arose, we communicated and resolved them quickly, ensuring smooth progress throughout the project.
